| Area , Perimeter and Volume | Measure the perimeter of simple 2D shapes | Find the area of rectilinear shapes by counting squares. | Measure and calculate the perimeter of composite rectilinear shapes in cm and m . | Recognise that shapes with the same areas can have different perimeters and vice versa. |
|  |  | Convert between different units of measure eg kilometre to metre. | Calculate and compare the area of rectangles (including squares), and including using standard units, cm2, m2 estimate the area of irregular shapes. | Recognise when it is possible to use formulae for area and volume of shapes. |
|  |  | Measure and calculate the perimeter of a rectilinear figure (including squares) in cm and m | Estimate volume (for example using 1 cm 3 blocks to build cuboids (including cubes) and capacity (for example, using water)). | Calculate the area of parallelograms and triangles. |
|  |  | Measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres. <br> Convert between different units of measure [for example, kilometre to metre] Find the area of rectilinear shapes by counting squares. |  | Calculate, estimate and compare volume of cubes and cuboids using standard units, including cm3, m3 and extending to other units (mm3, km3). |
